TEXTURED FIELD

Incorporating Textured Field into a project is a wonderful way to add variation, surface interest and color depth to any tile installation. Textures A, B, C, D, G, H, K & S are now available on all square & rectangle sizes 2x4 and larger, as well as the Large Arabesque, Large Elongated Ogee, Large Elongated Hex and 5" Hexagon at **standard field pricing**.

Textured field can appear either subtle or pronounced, depending on the glaze and color you choose. Using Watercolors will allow for more pooling and transparency, while using opaque, matte Craftsman glazes will create a subtle, overall textural surface. Textures, like glazes will vary in production. We recommend ordering current color samples to see the range of both texture and color.

SBN is not available in Textured Field, we suggest using the Mini Quarter Round as a finishing edge. Textures can be custom ordered on additional shapes and sizes if desired, call your customer service representative for special pricing.
